

Available for Immediate Delivery 6" CRA Mechanically Lined Pipe

Cladtek is pleased to advise that the following CRA pipe manufactured by Cladtek is available for immediate delivery:

Carrier Pipe	
• Grade	API5LX65 PSL2 SMLS
• Nominal Diameter	168.3mm OD
• Wall Thickness	11mm
Liner	
• Material	API5LD LC2262
• Wall Thickness	3.2mm
• Ends	Weld overlaid and machined
Quantity	4400m, in 12m nominal lengths
Location	Cladtek Works, Batam Indonesia
Price	Negotiable

This pipe is ideally suited for an offshore subsea flowline application and would meet requirements for offshore installation by conventional S lay and J Lay, or for installation by Reel Lay.

As a full CRA service provider, Cladtek can supply any required associated induction bends and fittings to suit the line pipe. We can also provide any required installation and in-service condition simulation testing, such as four point bend testing and reel lay simulations.

If you have a new field or new well to bring on-line, and time is valuable, we hope this rare opportunity to buy ex-stock will be of keen interest.
