

Cladtek Exhibits at Azerbaijan and Caspian Sea Oil and Gas Week 2015

The annual Azerbaijan and Caspian Sea Oil and Gas week was held this year in Baku from 28th to 30th September 2015, and Cladtek was proud to be an exhibitor.

CRA clad products have a significant role to play in the development of the region's oil and gas resources.

With oil prices at historically low levels, cost is a key consideration in both new development projects, and incremental enhancements to existing facilities including tie backs. Cladtek offers a range of cost effective CRA solutions including mechanically lined CRA pipe, and a one-stop-shop approach to weld overlay that includes pipe, fittings, flanges, induction bends, pressure vessels, valves and spooling and skid fabrication, assured to minimize interface risk and save time and cost in manufacture.

Cladtek has state-of-the-art manufacturing facilities in both Batam and Brazil with easy access to global shipping.

We are excited about the opportunities present in the Caspian and look forward to supporting our customers in the region with world class CRA clad products
