

CRA Clad Pressure Vessels

As a specialist in CRA cladding, Cladtek has been providing CRA clad pressure vessel components, including nozzles and flanges, to its customers for more than ten years.

In 2015, Cladtek took the further step of implementing full U, U2 and R stamp certification at its Batam facility, and while continuing to offer clad pressure vessel components, we are now also able to offer full design and fabrication service for pressure vessels.

Cladtek Pressure Vessel Capability includes:

- Slug Catchers
- Pig Launchers and Receivers
- Well Head Separators
- Knockout Drums
- Seawater Filters
- Condensers
- Columns and Reactors
- Any other vessel in corrosive service

Technical Details

Wall Thickness: up to 100mm
Diameter: up to 4m (larger diameters potentially available on request)
Length up to 18m
Clad Materials: Alloy 625, Alloy 825, CuNi, and a wide range of SS grades.

For large complex vessels such as finger slug catchers, Cladtek can supply prefabricated components for assembly on site and provide expert welding personnel to carry out the site assembly welding work if required.

Cladtek is an ISO 9001, ISO 18001 and ISO 14001 certified company for Quality, Safety and Environment.

Cladtek can also offer to complete your CRA Clad pressure vessel as a packaged scope covering piping, vessel and ball valves either as a skid or kit to save you time and money.

Cladtek, the world's No'1 CRA cladding company, now offering even more.
